Education

National Institute of Technology Andhra Pradesh — West Godavari, AP, India
B.Tech in Electrical & Electronics Engineering | CGPA-8.29 — *Dec. 2021 – May 2025*

Experience

Oracle Financial Services Software — June 2025 – Present
Associate Technical Consultant — *Bengaluru, India*

- Developed and customized backend workflows within Oracle **FLEXCUBE** by implementing scalable business logic and enterprise platform integrations for banking clients.
- Redesigned and owned the end-to-end file ingestion pipeline — shifting from server-side pickups to direct client uploads, cutting manual effort by **40%** and improving system reliability.
- Engineered low-level backend modules for file ingestion and parsing: request validation, database persistence, and PL/SQL batch integration.
- Resolved **90%+** of high-priority production tickets, ensuring timely delivery of critical patches.

Braini Academy — May 2023 – July 2023
Coding Mentor — *Proddatur, AP, India*

- Taught 100+ students C/C++ and Python, achieving a **95%** course completion rate and **75%** improvement in programming assessment scores.

Projects

ReconcileAI | *Next.js, FastAPI, PostgreSQL, Docker, OpenAI API, Google OAuth* — GitHub

- Engineered an **AI-powered invoice reconciliation platform** that extracts data from PDF/image invoices and performs **3-way validation** across vendor, currency, and purchase-order amounts; estimated to reduce manual review effort by **60–70%** for clean invoices.
- Implemented **secure finance workflows** using Google OAuth, RBAC, PostgreSQL Row-Level Security, human approval queues, and database-backed duplicate invoice prevention; supports **4 currencies** and **8 MB** document uploads. *(August 2026)*

BankSphere | *Spring Boot, MySQL, Apache Kafka, React, JWT* — GitHub

- Engineered a **banking platform with 3 Spring Boot microservices** (Customer, Admin, Notification) integrated with MySQL and Kafka, designed for **scalable, event-driven transaction processing** with <1s real-time notifications.
- Built a unified **React frontend** enabling **5+ secure banking operations** (deposits, withdrawals, transfers, transaction history, PDF statements), reducing authentication latency by **30%**. *(July 2025)*

Vihara Vista | *MongoDB, Express, React, Node.js, Tailwind, TypeScript, Stripe* — GitHub Live

- Developed a secure **hotel booking application** using **MERN stack**, **Tailwind**, and **TypeScript**, supporting **20+ registered test users** with JWT and HTTP-only cookies.
- Integrated **hotel management**, **Cloudinary-based image uploads** (**75+ images stored**), advanced search/sort/filter, and **Stripe payments**, successfully processing **50+ bookings with zero failures** during demo testing. *(Jan. 2024)*

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, C/C++, HTML, CSS
Frameworks & Libraries: Spring Boot, React, Node.js, Express, Tailwind CSS, Bootstrap, Apache Kafka
Databases: MySQL, MongoDB, PostgreSQL
Developer Tools: Git, Docker, REST APIs, VS Code, IntelliJ IDEA, Eclipse
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

Achievements

- Solved **750+ problems** on LeetCode & **100 problems** on GeeksForGeeks
- Ranked **1st** in my town in the **JEE Main**, **JEE Advanced**, and **EAPCET** examinations.
